CCS National Sales Summit Recap

Earlier this month CCS hosted its biennial National Sales Summit, an exciting two-day event featuring the CCS exclusive Exhibit Hall, expert panels, and the biggest CCS party of the year: the CCS Topgolf BASH!

The expansive CCS Exhibit Hall showcased 60-booths of the country's leading AV manufacturers including: Epson; Legrand; NEC; Crestron; and many more. 300+ attendees enjoyed cocktails and hors d'oeuvres Wednesday while exploring the Exhibit Hall, and the fun continued later that night at Topgolf Riverwalk for the CCS Topgolf BASH.

Thursday morning saw the debut of the first ever National Installer Olympics, featuring the top installers from across the CCS offices nationwide competing for gold. 12 participants raced through the installer themed and American Ninja Warrior inspired obstacle course. In the end, Adil Khan from CCS Central States office took home the prize.

CCS thanks those who joined us this year. If you missed out, be sure to mark your calendars for September 2020, we hope to see you there!

CCS NATIONAL SALES SUMMIT RECAP (continued)

CCS NATIONAL SALES SUMMIT RECAP (continued)

CCS Texas named one of the fastest growing AV firms by Commercial Integrator

In just two short years, CCS Presentation Systems Texas has increased its revenue by five times, establishing itself as a formidable presence in the Houston market.

However, the CCS family company didn't spring out of nowhere. "Our team is comprised of industry veterans with an average of 10+ years in the AV industry," says Ben Pickrel.

"Our team is highly skilled and has been in the AV industry long enough to have exposure to both the right and wrong way to conduct business. We have developed and refined our processes based on input from our team at every level and that creates a culture where people know they are valued and they can make a difference."

CCS Presentation Systems Texas expects to grow its presence in Houston and is making plans to accomodate that growth. "We continue to add resources on both the sales and operations side of the house in order to keep up with demand," Pickrel says.

"Our goal is to add team members that are focused on the customer experience at every level. Every interaction from the sales team, integration, accounting, and service after the sale must be focused on what is important to the end user." ~Tom LeBlanc
